NOTE TO TEACHERS:

The syllabus - a rationale

Books, and the authors who write them, have a complex relationship with the societies that produce them. It is hoped that this syllabus will help students develop both an understanding and an appreciation of some of the complexities involved in the production of and reception of British literature.

This syllabus is organised chronologically. It is intended to enable a student to understand the following things:

- One, how people lived during various ages in Britain.
- Two, what sort of social and political organisations evolved there.
- Three, what the beliefs and practices of the people were ie. how the culture of Britain evolved.
- Four, what kind of literature emerged out of these conditions.

None of these are dealt with at depth. A broad overall picture is what the student is expected to gain.

It is hoped that, apart from giving valuable background information that will enable students to understand and appreciate individual works from any age better, the syllabus will also help them develop a sense of history and the ability to organise, evaluate and present ideas from one coherent body of knowledge. This mental training should be as important as the facts that they study. Therefore teachers should take care to get students to read books and access other authentic sources to learn more about the topics covered.

NOTE TO TEACHERS:

The syllabus - a rationale Books, and the authors who write them, have a complex relationship with the societies that produce them. It is hoped that this syllabus will help students develop both an understanding and an appreciation of some of the complexities involved in the production of and reception of British literature.

This syllabus is organised chronologically. It is intended to enable a student to understand the following things:

- One, how people lived during various ages in Britain.
- Two, what sort of social and political organisations evolved there.
- Three, what the beliefs and practices of the people were ie. how the culture of Britain evolved.
- Four, what kind of literature emerged out of these conditions.

None of these are dealt with at depth. A broad overall picture is what the student is expected to gain.

It is hoped that, apart from giving valuable background information that will enable students to understand and appreciate individual works from any age better, the syllabus will also help them develop a sense of history and the ability to organise, evaluate and present ideas from one coherent body of knowledge. This mental training should be as important as the facts that they study. Therefore teachers should take care to get students to read books and access other authentic sources to learn more about the topics covered.

The objective of this course is to enable literature students to understand the language of cinema as also the ways in which that language is different from a literary language. Simultaneously they could also be taught the specificities of medium, narrative and the history of cinema. The lectures should use a lot of clips from different films to illustrate the points. It is strongly recommended that films or film clips should be screened as far as possible for every topic of this course. Any film of the teacher's choice other than the ones suggested may also be screened to illustrate the specific topics. The four films selected for close analysis help in understanding the narrative techniques of cinema, its engagements with sound, music and songs as also modes of adaptation from genres such as short story, play and novel.
